

PRACTICAL JYUTPING INPUT METHOD — INSTALLATION GUIDE

For Microsoft Windows 2000 Professional (English Version)

The version of *Practical Jyutping Input Method* released in 1999 can be used on a PC running Windows 2000 Professional. To install the input method in the English version of Windows 2000, please follow the procedure below:

1. Insert the *Practical Jyutping Input Method* CD into the CD-ROM drive.
2. When the CD Menu Screen pops up, please select “WinNT” (see the diagram below). Then, please select “**粵拼輸入法**” to start the installation program.
3. Follow the on-screen instructions to install the Jyutping Input Method.
4. When the installation completes, please open the “**Control Panel**” by opening the Windows “Start” Menu, then point to “Settings” → “Control Panel”.
5. In the Control Panel window, double-click the “**Regional Settings**” icon.
6. In the “**General**” page of the Regional Settings window, please check the “**System Language Settings**” list box and ensure that the “**Traditional Chinese**” option is checked (having a tick). If the option is *not* checked, please check it, click the “OK” button and follow the on-screen instructions to install the Traditional Chinese Language Pack.
7. Turn to the “**Input Locales**” tab and click the “**Add**” button. The “Add Input Locale” window will appear.
8. In the “Add Input Locale” window, select “**Chinese (Taiwan)**” in the upper drop-down list box, then select “**粵拼**” (located at the bottom of the list) in the lower drop-down list box. After that, click the “OK” button in this window and then the “OK” button in the Regional Settings window.
9. The Jyutping Input Method is now available for use.

Note:

The function “**相關字詞功能**” cannot be activated in Windows 2000.
